

# STAT! Users Newsletter

## President's Corner By Kim Hanson

Volume 1 Issue 4 10/25/07

I am happy to report several new developments.

Tech-Time, Inc. is growing and has purchased a new 5,000 square foot office building adjacent to the Briarwood Golf Course in Billings. It features separate conference and training rooms, offices with outside decks overlooking Blue Creek, and a reception area with cathedral ceilings. This allows Tech-Time to present a more professional corporate image

and represents the next step in our growth.

Everyone is very excited. Moving day is currently planned for the third week of February. Joseph Bongiorno has joined the Tech-Time team as our new programmer/analyst. He has 21

## CareVu Corporation Overview By Denise Purvis

Last month STAT! Health Information System became a tested vendor with CareVu Corporation. CareVu is located in Lubbock Texas and offers a full service healthcare EDI Clearing-house open to all providers in the healthcare community.

CareVu is committed to meeting all HIPAA requirements and leading the way in healthcare EDI services by offering a variety of services, including: Payer Connections, Eligibility and Claim Status, Electronic Remittance Advice (ERA), Reporting Features, On-line Data Corrections, e-Paper (Print-Mail) Services, and Patient Statements.

For more information on each of these services, please click [here](#) or visit [www.na-tech.com/pdf/CareVu.pdf](http://www.na-tech.com/pdf/CareVu.pdf)

## News Updates By Jim Moore

All previous issues of the STAT! Users Newsletter are now available online in PDF form. Visit the page by clicking on the STAT! logo on the NA Tech homepage, or visit [www.na-tech.com/STAT.html](http://www.na-tech.com/STAT.html)

NA Technologies will soon be marketing Sapheneia Clarity Server, a solution incorporating a toolbox of image filtering techniques that are configurable based on medical observer and image data at hand. Sapheneia Clarity Server image-processing software for Low Dose applications provides radiology, cardiology, oncology and other diagnostic imaging departments a unique software tool enabling dose-reduction when acquiring diagnostic data. Sapheneia Clarity Server solution allows for reduction of radiation exposure to patients (more so pediatric patients) and surgical/clinical personnel involved with image-guided procedures.

Contact NA Technologies for more information on this new product, click [here](#), or visit [www.na-tech.com/pdf/Sapheneia.pdf](http://www.na-tech.com/pdf/Sapheneia.pdf)

years experience heading software development teams, including two years with Siemens Medical Solutions Health Services Corporation (SMS). Joe will be keeping our software development projects on schedule and has already demonstrated that he has no problem sitting on my desk when necessary. Feel free to call and introduce yourselves.

Ken Kellum has joined our clinical software install team. As a registered radiology technician, he brings a wealth of clinical experience to our group and will be providing software design input as well as training and installation support.

Please join me in welcoming them to Tech-Time.

---
